---

Attached is an Addendum to the Offshore Final Phase I Field Sampling Approach for Gasco.

Sean, please review the section regarding protection of the pilot cap and let me know by the end of next week if you have any comments.

Rene, Jennifer and Cinde, the other elements of the addendum reflect field changes agreed to by DEQ during the initial field effort and were developed in response to conditions encountered during drilling. If you have any concerns, please call me or Dana Bayuk (503 229-5543) to discuss. Refusal associated with riverbank rip-rap did not occur during the initial field effort and all shallow groundwater samples were collected. Field work to complete the Phase I work is scheduled to resume December 11<sup>th</sup>.

Also, I will forward separately e-mails containing the documents referenced on the first page of the work plan addendum.

Dana; The addendum DEQ requested at our November 20 meeting is attached. The protocols in the addendum will be followed when the Phase I offshore borings continue next week.

Please contact Anchor if you have any questions.

John
